STRONG, SMOOTH ANTI-STATIC FLOORS FOR DATA CENTERS

The right floor is essential to housing your computer systems and related components. Stonhard seamless data center floors are formulated to support and protect your critical IT infrastructure.

Products & Installation

With more than a century of expertise and research and development, Stonhard brings innovative solutions to meet the needs of data halls, server rooms, build rooms, mechanical rooms, storage, POE areas, corridors, restrooms and offices.

The Performance You Require

We know your floors must support heavy, sensitive equipment. Stonhard high-performance floors for technology environments support heavy loads, keep dust to a minimum, dissipate static electricity and prevent static buildup.

- High Strength
- Self-Leveling
- Easy to Clean
- Abrasion Resistant
- Sustainable
- ESD/Anti-Static
- Fire Resistant
- Impact Resistant
- Smooth Finish

The Design You Desire

Sleek, smooth floors don't need to end at the data center. Our broad offering of colours and finishes will help you achieve modern design for your entire facility. Explore extraordinary artistic options with our brand, Liquid Elements.

The Expertise We Provide

More than a century of manufacturing and installing seamless floors. We meet safety regulations and honor specifications. Our direct sales force along with Architectural & Engineering Team and Construction Management Group work with you from product recommendation to final walkthrough.

Our Certifications

Stonhard is committed to sustainability and healthy products. Stonhard is ISO 9001 certified, a proud member of the U.S. Green Building Council, a member of the Manufacturer Advisory Panel for the HPD Collaborative and listed with mindful MATERIALS (mM).
